Current Focus

I'm a current student at Tunxis Community College, majoring in AI and computer systems. I've completed the AEGIS UCONN School of Engineering AI Certificate course, and I have been exploring a number of models, agent frameworks, and ways to use AI.

Work Experience

Work study • CJR School • 2024 - 2025

Due to excellent performance at school, I was given the opportunity to participate in a work study program supporting teachers in the classrooms as an aide.

Duties & Accomplishments:

- Helped design and develop learning materials for 12th grade World History class and middle school English class
- Provided technical support for teachers
- Created assignments and worksheets

Relevant Programs

UCONN: Agentic AI for Engineers

Learned how to use agents, how to create them, how they work, and the structure of AI models. 6 week program culminated in a capstone project using Claude.

Skills

AI Platforms: Claude Code, Codex, Antigravity, Pi, Langflow

AI techniques: Agentic AI, Language Engineering, AI-Based Software Development

Education: Current student at Tunxis Community College

Certificates earned:
